

The Genetics of Frontotemporal Dementia

Dr. Suzee Lee, MD

Assistant Professor of Neurology

University of California, San Francisco

Memory and Aging Center

SATURDAY November 7th, 2015 | 6:00-8:00 p.m.

AAN HEADQUARTERS | 201 CHICAGO AVE | MINNEAPOLIS, MN

6:00-6:30 p.m. Reception

6:30-7:30 pm Program

7:30-8:00 p.m. Questions/Networking

MSNS Members Free Non-Members \$30

Suzee Lee, MD

Dr. Lee received a BA degree in English from Harvard and an MD degree from McGill University in Montreal, Canada. She then completed an internal medicine internship at Brown University and neurology residency at Mount Sinai Hospital in New York City, serving as Chief Resident in her final year. Dr. Lee completed a behavioral neurology fellowship at the UCSF Memory and Aging Center. She is a neurologist who evaluates and treats patients at the Memory and Aging Center.

Dr. Lee's research focuses on neuroimaging in atypical dementias, such as corticobasal degeneration and frontotemporal dementia. Her interests also include understanding genetic susceptibility in atypical dementias.

A special thanks to the American Academy of Neurology for supporting this event.
